

INVITATION TO WORKSHOP

9.12.2016

## Aggregation in reserve markets

Dear stakeholder in the Nordic Electricity Market,

The Nordic Transmission System Operators (TSOs) will arrange a workshop with a purpose to give information and discuss aggregation in the reserve markets.

**Date: Tuesday 7<sup>th</sup> February 2017**

**Time: 10:00 - 15:30** (registration starts at 9:30)

**Place: Radisson Blu Arlandia, Arlanda, Sweden** (shuttle bus from the terminals)

The Nordic power system is changing due to climate change and political ambitions. In order to ensure the security of supply and efficiency of the electricity markets following the decarbonization of the energy sector, it is imperative that all flexibility potential in the system is made available. The new EU legislation, i.e. Guideline on Electricity Balancing and Clean Energy Package (Winter Package) suggest that aggregation of demand facilities and generation facilities should be allowed in order to realize this potential. A new actor, the aggregator, may facilitate the realization for a part of this potential.

There is an ongoing Nordic TSO project which is investigating this new role. In the workshop, TSOs wish to gather feedback from stakeholders. **The preliminary agenda for the workshop:**

9:30 Coffee and registration

10:00 Introduction and background

11:15 Discussion in smaller groups

12:30 Lunch

13:30 Learnings from the discussions

14:15 Next steps

14:30 Coffee

14:45 Ongoing pilots

15:30 End

The forum will be held in English.

Please save the date and send your binding registration including information about possible special diet by **Tuesday 10<sup>th</sup> January 2017** to email: [administrativservice@svk.se](mailto:administrativservice@svk.se) (please label the mail with "Aggregator")

Please notice, that for practical reasons, it might be necessary to restrict the number of participants from each stakeholder.
